Week 3: pro 2:

Librabry Management System

```
from abc import ABC, abstractmethod

# Abstract class
class LibraryItem(ABC):

    @abstractmethod
    def issue(self):
        pass

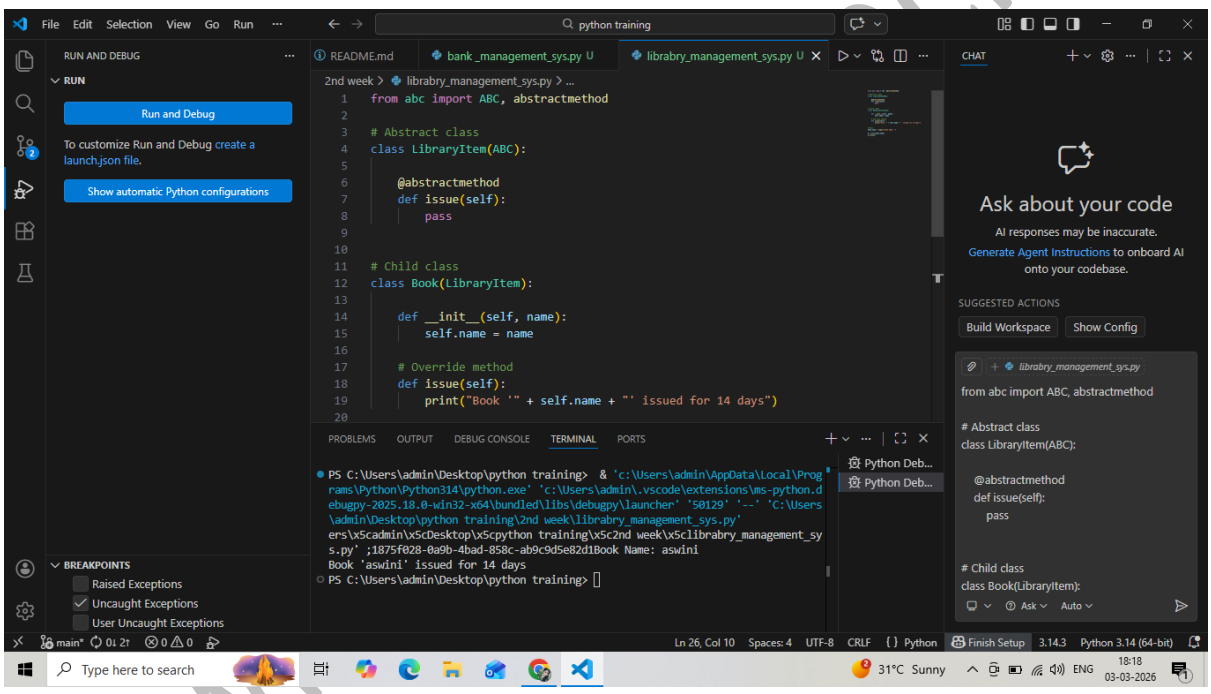
# Child class
class Book(LibraryItem):

    def __init__(self, name):
        self.name = name

    # Override method
    def issue(self):
        print("Book '" + self.name + "' issued for 14 days")

# Main
book_name = input("Book Name: ")
```

aswini.s 3rd yr btech IT

b = Book(book_name)


b.issue()
